For the last couple of hours they have been uploading child exploitation image artifact materials onto social media WWW sites, having accounts that were registered using my credentials. More identity theft and cyber terrorism.

They have hacked, edited, altered, changed, fictionalised and replaced most if not all of the transcripts, alibies, police report files, HTML files and other authored documents that incriminated them in nothing more than interacting with me.

In the past hour, they "throttled" the bandwidth of my computer so that I could not browse the WWW. The hacking has been increasing since June 2018, when it was sporadic with an interval of weeks to months, such that now they are hacking in real time, all day, each and every day.

LF got some tools for HTTP TCP/IP intercepts, file directory functions and file retrieval and replacement functions from the Dark Web (so he tells me). He has now (as of tonight) shared them along with the spreadsheets governing my "detuning", torture, destitution, misery, drug consumption, data theft, money theft, unemployment, interpersonal interactions, food availability and all other things of everyday life, with the Brethren, and his other many fellow culfluous psychenfrenics. They are now and have been using them to delete kids homework and assignments for school, their social media and digital activities, and their daily psychosocial and economic activities. Many will die. They are defenceless, and the constant planning of their normally volitional and autonomous behaviour leaves them fatalistically unable to conduct themselves in the world.

At 0421, I was in bed, though they increased my alertness so that I could not sleep. There was a "team" discussing about how many young lives would be lost through suicide. The couple of few mentioned that they thought my research was important (but now 261122 2339, there are no couple of few, and I realise it is only important to prevent it getting out, and to earn JD bag loads of revenues and monies).

The others, the 'team', were extremely upbeat and jocular about how many Masons had obtained these hacking tools and spreadsheet templates and content guidelines. I was asked by one of the few if I could do some posts on the mental health forums, forewarning young schizofrenics of their peril. But I stated "No! Give JD a chance. Let her have the opportunity to help them. She could put one on Psychforums, one on the Mental Helath Forum and one on schizophrenia.com. Give her a chance".
